DETAILED ACTION

Response to Amendment

1. The amendment filed on 12/3/07 has been received and made of record. As requested, claims 1 and 20 have been amended and claim 2, 3, 21 and 22 have been cancelled.
2. Claims 1, 4-20 and 23 -38 are pending.

Claim Rejections - 35 USC § 102

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. The 120(b) rejections of claims 1, 4, 6, 10-12, 18-20, 25, 29-31, 33, 37 and 38 are maintained.

Claim Rejections - 35 USC § 103

5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
6. The 103 rejections of claims 5, 7-9, 13, 15-17, 24, 26-28, 32 and 34-36 are maintained.

Response to Arguments

7. Applicant's arguments filed 12/3/07 have been fully considered but they are not persuasive. More specifically, applicant argues:

“Lebner thus fails to disclose first and second anchoring members produced from an elastic polymeric material and instead discloses an inelastic device made either from inelastic material or from elastic material reinforced with rigid, inelastic material. The substantially inelastic device of Lebner '564 thus precludes inclusion of elastic first and second anchoring members.”

The examiner disagrees with applicant's characterization of the Lebner patent. Lebner discloses that flat flexible components (first and second anchoring members) and the elongated connectors may be produced from an elastic material which is reinforced with an inelastic structural component thereby rendering the device substantially inelastic. Thus, Lebner discloses that the first and second components are produced from an elastic material (inherently a polymer), and that the one or more first and second connecting members are produced from a substantially inelastic material, namely, the inelastic structural component that reinforces the elastic material.

As to the different functions of the elastic components of Applicant's instant invention and the inelastic components of the Lebner '564 patent, the claimed structural language does not define over the components in the Lebner' 564 patent. Therefore, the Lebner '564 patent does not teach away from instant claims 1 and 20.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
